DRYSHOD®

WATERPROOF FOOTWEAR

Dryshod® is the world's most wearable rubber boot!

Dryshod® footwear products go “Beyond Waterproof” by providing weather-proof technologies to keep your feet warm, dry and protected in the harshest weather and messiest working conditions. The secret to Dryshod boots effectiveness is our exclusive self-insulating, waterproof DENSOPRENE® foam bootie construction and HYDROKOTE® water repellent textile treatment.

100% WATERPROOF - Designed and built to be 100% waterproof from top to bottom

5 mm DENSOPRENE® FOAM INSULATED BOOTIE - Keeps out the cold & wet - keeps in the warm & dry
DENSOPRENE foam is a super dense neoprene material that keeps the cold/wet out and the warm/dry in. This waterproof and self-insulating foam is naturally lightweight, buoyant and very comfortable - your foot and lower leg stay warm and protected in cold and wet conditions. In fact, they are constructed with the same material as deep-water dry suits. Dryshod materials exceed the long-term effectiveness of waterproof membrane materials and provide greater insulating properties per volume than fine-layered substrates.

Standard on all Dryshod models except Hogwash and Sod Busters

HYDROKOTE® WATER-REPELLENT - No more soggy boots. Water rolls off and dries in seconds
HYDROKOTE water repellent is featured on all Dryshod footwear products. The textile cover on the entire bootie is treated with a nano-scale hydrophobic coating that repels water and mud on contact. This keeps the textile exterior surface of the boot from icing up in freezing temps and from retaining water in the fibers in wet conditions. With HYDROKOTE, soggy boots are a thing of the past.

4-WAY STRETCH BREATHABLE AIRMESH LINING - Moves the air to keep your feet dry and comfortable
All Dryshod footwear is lined with our exclusive breathable airmesh lining to keep your feet dry and comfortable. Structured-airmesh has a top layer and a bottom layer that is held apart by thousands of tiny vertical fibers. As you walk, air is pushed and circulated through the vertical fibers allowing the skin to breath thus keeping the boot dry and humidity-free within the boot's specified comfort range. Dryshod footwear linings are nonabrasive and hypoallergenic. When you see the orange 4-way stretch lining, you know it's breathable airmesh - NOW YOUR FEET CAN BREATHE!

EASY-ON/EASY-OFF - 4-way stretch materials and generous heel kick for easy-on/easy-off convenience

ROLL-DOWN CALF PIPE - Roll down the top to tuck in your pant leg or vent in warm temperatures
Soft, not stiff upper! The upper calf and topline areas are made of soft, flexible DENSOPRENE foam and 4-way stretch lining that will “stretch-fit” to virtually any calf. With the flexible upper, the pant leg can be worn over or inside the boot. In the event of heat and moisture build-up, the top collar on Dryshod Boots can be folded down to vent the boot.

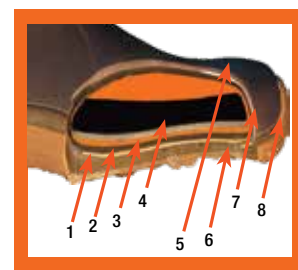

GENUINE NATURAL-RUBBER OVERLAYS - Only genuine hand-laid rubber. No PVC, PU, or TPR
Genuine natural-rubber overlays also serve as a protective skin for Dryshod footwear. The rubber will stay flexible for years and will not cold-crack like footwear made of PVC, Urethane and TPR materials. Dryshod overlays are also double-reinforced in the toe area and triple-reinforced in the heel area. Dryshod outsoles are made of premium natural-rubber for long wear and optimum traction.

SUPERIOR STABILITY - Reinforced tuck board with rigid shanks for added stability

SUPERIOR FIT AND COMFORT - Slipper-soft comfort and sized to athletic-shoe standards

CONVENIENT BACK-PULL TABS - Sturdy pull tabs for easy-on/easy-off convenience.

Dryshod Footwear Anatomy

1. Reinforced tuck board with rigid shank
2. DENSOPRENE insulated bootie
3. Breathable airmesh lining
4. Form-fit sock liner
5. Natural-rubber overlays
6. DS1/DS2 - Cold-blocking EVA midsole
7. Rigid rubber toe protection
8. DS1/DS2 - Outsole toe bumper

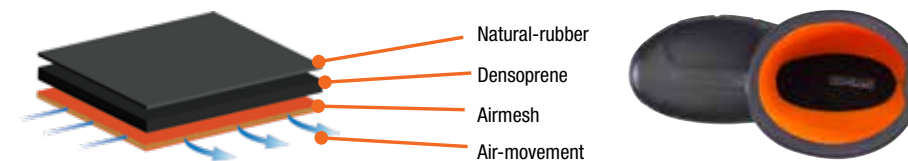

DRYSHOD®

BEYOND WATERPROOF

Breathable 4-Way Stretch Airmesh Lining - standard on all models

- Provides superior comfort and breathability by wicking away humidity and perspiration
- Made up of thousands of tiny vertical fibers that allow the air to circulate throughout the interior lining surfaces - airmesh allows feet to breathe!
- As you walk, air is pushed and circulated through the vertical fibers allowing the skin to breath - keeps the boot dry and humidity free
- Nonabrasive and hypoallergenic

Orange Lining = Airmesh

WIXIT Cool-Clad Airmesh™ Lining - bonus

- Features micro-dot perforations
- Wicks moisture away - allows the air to flow more than our traditional airmesh lining
- Keeps feet cooler in warmer temperatures
- Available on Hogwash, Sod Buster, Southland, ViperStop and Steel-Toe WIXIT models

Grey Lining = WIXIT Cool-Clad Airmesh

5 mm DENSOPRENE® Foam Insulated Bootie - standard*

**5 mm standard on all models except Sod Busters & Hogwash*

- Keeps out the cold and wet – keeps in the warm and the dry!
- Self insulating and waterproof and acts as a neutral medium between inside/outside temperatures
- Flexible 4-way stretch is naturally lightweight, buoyant and very comfortable
- Material keeps foot and lower leg warm and protected

HYDROKOTE® Water-Repellent - standard on all models

- No more soggy boots! Textile is treated with a nano-scale hydrophobic coating that repels water and mud on contact
- Water rolls off the nylon outer and dries in seconds and keeps the exterior textile from icing up and from retaining water in the fibers

Polar Fleece Lining - bonus

- 6 layers of protection + EVA cold-blocking midsole = 7 layers
- Warmest boots in the Dryshod product line with a comfort rating to -50°F
- Extra 2.5 mm of densoprene on entire foot area provides extra warmth
- Additional 2 mm of polar fleece lining
- Available on the NoSho, NoSho XT, Overland Max, Arctic Storm and Steel-Toe Max

ChemFlex Rubber - bonus

- ChemFlex chemical-resistant rubber withstands just about anything you can step in, pour on or splash through in the barnyard environment
- Available on the Dungho and Barnstable

Slip Resistant Tread - bonus

- Hard-rubber sole designs that are highly slip resistant on hard surfaces
- Available on the Dungho and Steel-Toe models

Farm/Ranch Boots men/women

**Warmth. Durability. Comfort. Protection.
Barnyard Tough.**

The right pair of boots, designed to meet the demands of your job, should keep your feet comfy all day. A great pair of work boots are a vital tool of your trade. Sloppy conditions are no match for Dryshod!

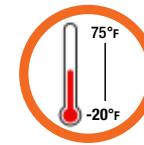

Haymaker Gusset Hard Working Farm Boot

Tough conditions call for a tough boot - the Haymaker is ideal for messy, rugged outdoor terrain! Gusset model now available with big calf comfort in men's and women's models.

When it comes to living in an environment that contains snakes – why take chances with a possible snake strike? Dryshod Footwear believes in the testing and product development used in producing our ViperStop product. Our boots are manufactured with penetration resistant rubber that gives the lower leg at minimum 16" of coverage. To ensure our products are worthy of being in the dangerous environment of snakes – we contract a third party to test our Viperstop. This third-party inspection includes inserting inflated latex balloons into the shaft of the product. This is followed by three to six strikes by a Western Diamondback Rattlesnake ranging from three and five feet in length. This test easily identifies if the strikes are penetrating the protective rubber. Be assured that our boots are made with high end, top grade materials to withstand the dangerous environments of snake country. Although Dryshod thoroughly tests the penetration resistance of our ViperStop rubber boot, snake country is a very unpredictable place. In order to ensure your personal safety, you should use extreme caution when in an environment containing snakes and do what is possible to avoid confrontations with snakes. Dryshod Footwear makes no claims that the ViperStop boot is impenetrable by all snake bites. Serious risks are always present in snake country. No snake boot is 100% snake proof. This product is not to be interpreted as "snake proof" or that no injury to a user of the item is possible. In wearing the Dryshod Viperstop, you are assuming all risks arising from being in environments that contain venomous snakes. This includes all risks of injury or death from a bite while wearing ViperStop, and Dryshod will have no liability with respect to such injury.

Outdoor Boots women
